

ARC MASTER

RADIUS GAUGES

The ORG-3600 MEASURES ANY OUTSIDE RADIUS from 6"(150mm) to 144"(3600mm) in Metric or Imperial.

The IRG-3600 MEASURES ANY INSIDE RADIUS from 6"(150mm) to 144"(3600mm) in Metric & Imperial.

The Variable Arc
This unique tool automatically forms the arc, the Arc Master Radius Gauge is set to.

The Variable Arc
This unique tool automatically forms the arc, the Arc Master Radius Gauge is set to.

Measure or trace any size arc on any flat surface. An excellent tool for drafting or duplicating arcs.
The Variable Arc is Tough and Flexible, remove it from the gauge and be creative.

The Variable Arc is Tough and Flexible, remove it from the gauge and be creative.

The ORG-3600 works the same way as the ORG-750, but on a larger scale.

The IRG-3600 works the same way as the IRG-750, but on a larger scale.

It folds into a compact 5" by 16" for easy storage and unfurls in seconds to take a radius measurement.

It folds into a compact 5" by 16" for easy storage and unfurls in seconds to take a radius measurement.

The ORG-3600's smooth action makes it easy to take a quick measurement, a **Locking Knob** then keeps it in place.

The IRG-3600's smooth action makes it easy to take a quick measurement, a **Locking Knob** then keeps it in place.

Use the **Lock** incrementally to increase friction that's useful in certain circumstances.

Use the **Lock** incrementally to increase friction that's useful in certain circumstances.

Measure rolled pipe, flats, angles, plate, bump-rolled sheet metal, wood etc... , even arcs drawn on paper.
