

PRCE

Synchro Electric Press Brake

Thinking Future

PRCE SYNCHRO ELECTRIC PRESS BRAKE

PRCE is a fully electric machine. Using **SYNCHRO technology** that controls **2 axes during the bending**, thus being able to compensate the axes Y1 and Y2 independently.

This system developed by RICO includes the drive through 2 high-quality ball screws with low noise, guided by two servo motors and helical gear boxes in order to guarantee the best performance and durability. This reduce all effects caused by inertia compared to similar systems of the belt. **This press brake is integrated with the highest technology coupled with a friendly use. This model is a top machine that guarantees high precision and competitiveness.**

ADVANTAGES

- Short cycle time
- Low energy consumption
- Low maintenance
- Low noise

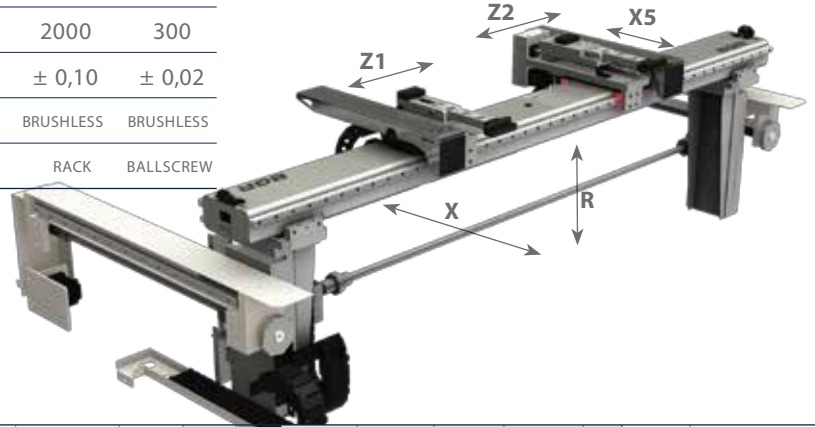

MAIN CHARACTERISTICS

- Bending accuracy: 2,5 μ
- Approach speed: 220 mm/s
- Return speed: 220 mm/s
- Bending speed: 10/20 mm/s (the second speed is only available for some markets)
- Start/Stop function
